EDUCATION

Madras Institute of Technology (MIT), Anna University <i>Bachelor of Engineering in Computer Science and Engineering</i> CGPA: 8.52/10.00	Chennai, India 2023 – 2027
Indian Institute of Technology Madras (IIT Madras) <i>Bachelor of Science in Data Science and Applications</i> CGPA: 7.02/10.00	Online 2023 – Present

EXPERIENCE

Data Science Intern <i>Dover Corporation</i>	May 2026 – July 2026 Bangalore, India
- Worked with the Data Analytics team to develop enterprise AI solutions for engineering, marketing, and service operations. - Built production-ready LLM applications and contributed to enterprise AI adoption across multiple business workflows. - Collaborated on scalable AI deployments, cloud infrastructure, and DevOps practices in an enterprise environment.	
Web Development Intern <i>Novitech</i>	May 2025 – June 2025 Online
- Developed responsive full-stack web applications and implemented new features for client projects. - Collaborated with developers to integrate backend APIs, optimize UI, and resolve production issues.	

PROJECTS

Enterprise Agentic AI Platform <i>MCP, LLMs, Docker</i>	May 2026 – July 2026
- Developed enterprise Agentic AI applications using LangChain, RAG, FAISS vector search, and Azure OpenAI. - Implemented MCP-based tool calling, multi-repository semantic retrieval, and AI-powered enterprise assistants. - Containerized AI microservices with Docker and Kubernetes for scalable deployment.	
Distributed GPU Cloud Orchestration Platform <i>Docker Swarm, GlusterFS, Prometheus, Grafana</i>	
- Designed a high-availability 10-node GPU cloud cluster for centralized machine learning workloads. - Built FastAPI-based scheduling with role-based booking, JupyterHub provisioning, and distributed storage using GlusterFS. - Integrated reverse proxy, SSL, Prometheus, Grafana, and Portainer for secure monitoring and management.	
AI-Powered Cloud FinOps Platform <i>AWS CloudWatch, LightGBM, Isolation Forest</i>	
- Developed a cloud cost optimization platform using AWS CloudWatch metrics. - Implemented anomaly detection and cloud cost forecasting using Isolation Forest and LightGBM. - Built interactive dashboards for cloud utilization analysis and optimization recommendations.	

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript
AI & Machine Learning: LangChain, Retrieval-Augmented Generation, FAISS, MCP Servers, Azure OpenAI
Frameworks: FastAPI, Spring Boot, React.js, Node.js, Express.js
Cloud & DevOps: Docker, Kubernetes, Docker Swarm, GlusterFS, Prometheus, Grafana, AWS CloudWatch
Databases: PostgreSQL, MongoDB, Firebase Firestore
Developer Tools: Git, GitHub, JupyterHub, Portainer, Postman

CERTIFICATIONS

IBM: AI Fundamentals
GOOGLE: Cloud Cybersecurity Professional Certificate
NPTEL: Python for Data Science
NPTEL: Deep Learning
